READING COMPREHENSION

1. Match the picture to the text

1. _____

This hotel is called the Ice Hotel because it's made completely of ice and snow. It's in Sweden in a town called Jukkasjarvi. It's a temporary hotel, they have to build it again every winter because in summer it melts when the temperature starts rising. It needs a constant temperature of below freezing so less than 0 degrees centigrade. You can stay there for a few days and nights of course. You probably won't want to stay longer unless you really like living in a very cold place! The bar is made of ice and the glasses are also made of ice! The entrance is full of ice statues and even the beds are made of ice, so the visitors sleep in sleeping bags or animal skins, reindeer skins actually. Hot food is prepared but they can't cook it in the hotel, they cook outside on an open fire.

2. _____

This hotel is partly above the water and partly under the water. It's one of the world's first underwater hotels. Imagine waking up and seeing fish swimming around your room. But of course, they aren't actually in your room. You are watching them through huge glass windows. It's the same in the restaurant, you sit at your table and the fish are just a few centimeters from you but on the other side of the glass. It has a swimming pool (without fish of course), tennis courts and a golf course.

Activity: Read and answer the questions

1. When is the ice hotel build?
2. What are beds and glasses made of at Ice hotel?
3. Where is food prepared at Ice hotel?
4. Where is the second hotel build?
5. What can people see around their rooms?
6. What activities can people do in the second hotel?
